

Themed play - play combinations

Themed play - play combinations

Themed play combinations

eibe themed play - design a world of fantasy and adventure.

Let us introduce you to the fantastic world of themed playgrounds. Children's enthusiasm for playgrounds focusing on a theme is unsurpassed. Each play system is the setting for thrilling stories. Allow yourself to be drawn into the unique world of playing.

Quality features/materials:

- high pressure laminate (HPL): durable, highly scratch-resistant laminate
- stainless steel (V2A): corrosion-resistant steel with chrome and nickel alloy
- hot-dipped galvanized steel: corrosion-resistant coating of metal parts with or without powder coating
- pressure-impregnated timbers with the pith removed acc. to RAL : first-grade timber with a 10-year guarantee against rotting and fungus.
- 3-layer-slab: three-layered wooden slab for exterior application with environmentally friendly undercoat and glazing
- Nets: Nets and ropes made from armored rope, which has a four-cord steel core solidly encased in polypropylene and having optimum abrasion values
- high-quality plastic (PE)

For a detailed overview of materials, see from page 540.

eibe ibondo Western – in the country of cowboys, Red Indians and gold diggers!

After a long overland ride accompanying the new settlers, it is great to have a rest on the porch of the saloon. The sheriff's office is next door, so law and order are observed and all scoundrels are under control.

Refreshed from our break, we can now continue our ride to a village of friendly Red Indians.

Themed play - play combinations

eibe ibondo Maritim – At high sea

„All hands on deck! Haul in the nets!“ „Aye aye Captain!“ Quickly over the swaying planks to the bow, anchor aweigh!

2 points backboard, full speed ahead into the port.

The lighthouse of our port appears on the horizon, and now we can see the pier. This is where we unload and sort the cargo. And as soon as the holds are empty, we will leave the port again to face new adventures at high sea.

eibe ibondo jungle
Deep in the ancient forests!

Struggling through the undergrowth, climbing over fallen trees, swinging from lianas.

The expedition has covered much distance today and needs a rest. Now we have time to discover exotic plants and listen to the jungle sounds. But one of us has to be on guard all the time - you never know if a tiger is stalking the camp or hostile aborigines are planning to attack us.

eibe Post Bases

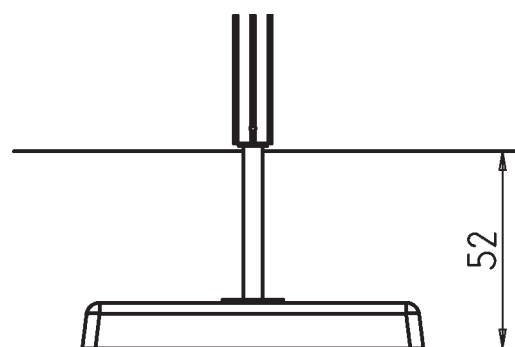

eibe has developed post bases specifically for **eibe** wooden posts.

They must be fastened to the uprights with saucer-head or hexagonal screws. The required bore is covered after fixing with a sealing cap and therefore remains invisible. After the post bases have been aligned, they are screwed to concrete foundations cast on-site or to **eibe** prefabricated foundations.

Quality features of the eibe post bases:

- hot-dip galvanized steel
- extremely stable design due to an 8 mm-thick base plate, 16x8 cm, and a 60 cm-long upright, $\varnothing$ approx 42 mm.

This type of post foundation can be used in any location in accordance with requirements and the existing local conditions, for example for pergolas and playhouses on paved surfaces.

eibe prefabricated foundation

eibe prefabricated foundations only have to be buried in the ground. There is no need to transport materials to the site, nor to mix concrete or wait for foundations cast on-site to dry out. Levelling is easy – simply lower the **eibe** foundation into the ground or backfill it. **eibe** prefabricated foundations are fitted with mounting rails so that there is no need for the time-consuming drilling of dowel holes. **eibe** prefabricated foundations are rounded off all around the upper edge, minimising the risk of injury through exposed foundations. **eibe** prefabricated foundations are buried to a depth of 52 cm for colorino systems.

The Main Advantages of eibe Prefabricated Foundations

- 1.Reduced earth excavation
- 2.No waiting time for concrete to set
- 3.Independent of weather conditions
- 4.Easy levelling
- 5.Mounting rails allows greater flexibility when installing upright posts
- 6.Quick and easy installation
- 7.Complies with **EN 1176**

eibe fantallica Space travel and North pole adventures

Right after the spacecraft started at breathtaking speed, we have a wonderful view of innumerable stars and planets. What will we discover on our journey? All the crew is full of commitment and thrilled to have fascinating adventures.

Master the rough seas on the Viking ship to get all the way up North to the ice princess' fairytale crystal castle - this is our destination. On our way, we have to cross rugged landscapes of ice and to face many challenges. And never underestimate the Ice Queen: in her ice palace, the next adventure is waiting for us!

**Themed play
- individual play
equipment**

Themed play - individual play equipment

Themed play - individual play equipment

Themed play - design a fantastic world of adventures.

Let us give you a tour of the fantastic world of themed playgrounds.

Each play equipment offers a multitude of charming details that let the children experience thrilling themes in a variety of fashions.

A highlight on any playground, and a wonderful addition to the themed play combinations of the **minimondo** and **ibondo** series.

Quality features / materials:

- high-pressure laminate (HPL): a durable, highly scratch-resistant laminate
- stainless steel (V2A): non-corrosive, nickel-plated steel with chrome alloy
- hot-dip galvanized steel: non-corrosive plating of the metal components, with or without powder-coating

- pressure impregnated timber with the pith removed, in accordance with RAL. top quality timber with 10 years' warranty against rotting and wood pests
- 3-layer slab: slab of three-layered wood material for outdoor applications, with environmentally friendly primary and finish coat of paint

- Nets: cables and nets are made of armoured rope which has a four-core steel cord that is securely coated with polypropylene and has extremely good anti-abrasion properties.
- High-grade plastic (PE)

- individual play
equipment**

Air travel - high up in the sky

Feel like a bird and experience the freedom of the sky, learning lots of new things

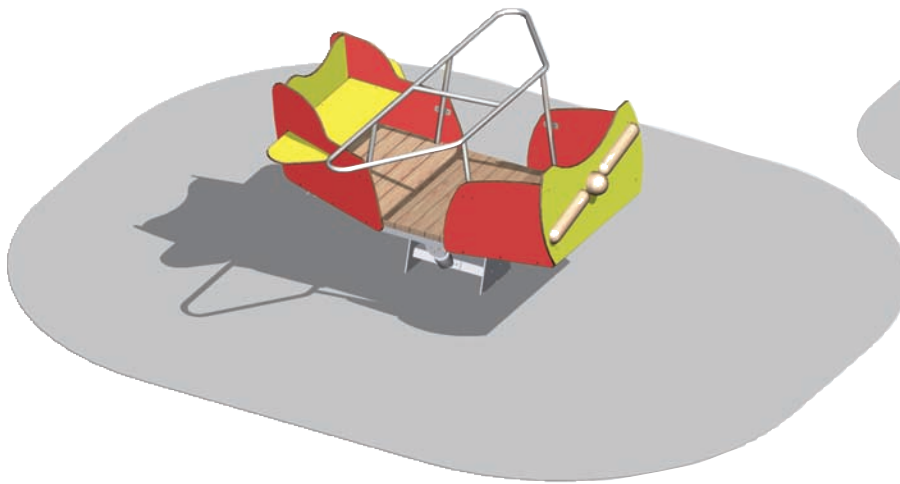

Whether airplane or helicopter, the pilots safely set the course for the destination.

But will they manage to land the aircraft the first time?

basis

Themed individual play equipment air travel

- Exchangeable bearing
- Holding grips and countersunk areas for safe play
- Maintenance-free themed panelling

elbe basis Motion-active airplane

Experience the freedom of flying: being able to move in all directions, the airplane offers the children a very special experience. Here, play values like rocking, balancing and role play are combined.
